

EMLYON Business School

7th New Institutionalism Workshop

17th–18th March 2011, Lyon

Call for Papers

The 7th workshop on new institutionalism in organization theory will take place in spring 2011. The aim of the workshop is to bring together academics from various disciplines who are interested in further developing theoretical and/or empirical research based on institutional theory. The workshop will take place at EMLYON Business School, nearby Lyon, France.

In order to capture as wide a picture of institutional research as possible, the call for papers for this 7th workshop does not have a narrow thematic, methodological or conceptual focus. In keeping with the network idea, the purpose of the workshop is to encourage cooperation, particularly between different disciplines.

Completed projects, work in progress and planned projects can be presented at the workshop, which is aimed both at experienced and younger academics.

The keynote address will be given by Michael Lounsbury (U. of Alberta).

Submissions (extended abstract or full paper) should be sent to niw2011@em-lyon.com no later than November 14th, 2010.

More details about the workshop can be found at:
<http://www.newinstitutionalism.org>

We hope that the workshop will attract many participants and we look forward to fruitful discussions.
